Erkki Oja received the D.Sc. degree from Helsinki University of Technology in 1977. He is Director of the Computational Inference Research Centre and Professor of Computer Science and Engineering at the Laboratory of Information and Computer Science, Aalto University, Finland. He holds an honorary doctorate from Uppsala University, Sweden, as well as from two Finnish universities. He has been research associate at Brown University, Providence, RI, and visiting professor at the Tokyo Institute of Technology, Japan. He is the author or coauthor of more than 300 articles and book chapters on pattern recognition, computer vision, and neural computing, and three books: "Subspace Methods of Pattern Recognition" (New York: Research Studies Press and Wiley, 1983), which has been translated into Chinese and Japanese; "Kohonen Maps" (Amsterdam, The Netherlands: Elsevier, 1999), and "Independent Component Analysis" (New York: Wiley, 2001; also translated into Chinese and Japanese). His research interests are in the study of principal component and independent component analysis, self-organization, statistical pattern recognition, and applying machine learning to computer vision and signal processing.

Prof. Oja is a member of the Finnish Academy of Sciences, Finnish Academy of Technical Sciences, the Academia Europaea, Fellow of the IEEE, Founding Fellow of the International Association of Pattern Recognition (IAPR), Past President of the European Neural Network Society (ENNS), and Fellow of the International Neural Network Society (INNS). He is past chairman of the Finnish Research Council for Natural Sciences and Engineering. He is a member of the editorial boards of several journals and has been in the program committees of several recent conferences. Prof. Oja is the recipient of the 2006 IEEE Computational Intelligence Society Neural Networks Pioneer Award.
